

## **Battery Laser Ray Box**

The unit utilises a Class II laser element, which makes it safe for school use. The use of laser protection goggles is not required as the laser light contains no infra red content.

The unit is switched on/off via the keyswitch for which two keys are supplied. Please ensure that the unit is switched off when not in use.

The Ray Box comes fitted with 2 x AA Alkaline Manganese cells, which should last, in normal use, about a year.

Replacement of the cells requires the four screws on the underside of the unit to be removed to gain access to the cell holder.

**Electrosound, 30 Goulds Farm, Rayne, Essex CM77 6DF Tel/Fax 01376 340506**
